-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Figure 1 appears to be prior art. If so, it should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

In Figure 2, it is noted that both first and second rod ends 32 and 34 are attached to piston 38, which are inconsistent with the description in the specification, wherein, first rod end 32 is connected to piston 38, and second rod end 34 is connected to the cylinder.

Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The language of the specification and the claims is confusing because the cylinder is described and claimed as being connected to the first end of the rod, and the piston is described and claimed as being connected to the second end of the rod. Note that it is clear in Figure 3 of the instant drawings, wherein, the piston and cylinder are not connected to either end of rod 26. Correction is required. Applicant is suggested to clarify the language of the specification and claims with the followings: a first rod portion having first end 32 is connected piston 38, and a second rod portion having second end 34 is connected to cylinder 36.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Feucht (US 1,480,678).

Feucht discloses a rod structure, having all the features as broadly recited in the instant claims, including a first end and a second end connected to cylinder 24 and piston 26, respectively, two springs 25, 31 provided at both ends of piston 26, and inner tubular member 23 with elongated slot 28. Note that tubular member 23 with elongated slot 28 of Feucht is readable as a restraining mechanism that prevents the movement of the piston when the piston reaches an end of slot 28, and that when or if tubular member 23 is removed, the piston movement is then limited by only two springs 25,31.

Regarding the instant claimed intended use as a throw rod for a rail switch, note that since the structure of Feucht is inherently capable of the instant claimed intended use, the instant claimed intended use limitation is considered met.

5. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant should further consider the structures of Ingram, McGowan, and Wood.
